

AMENDMENTS TO THE CLAIMS:

The listing of claims will replace all prior versions, and listings of claims in the application:

LISTING OF THE CLAIMS

1. (Currently Amended) An apparatus for filtering molten metal before entering a dosing tube, the apparatus comprising an mounting portion; a filter body connected to the mounting portion, the filter body having a ~~substantially flat~~ beveled end opposite the mounting portion; and a ~~substantially planar~~ surface attached to and substantially covering the ~~substantially flat~~ beveled end.

2. (Currently Amended) The apparatus of claim 1 wherein the mounting portion is ~~adapted~~ dimensioned to fit around the dosing tube.

3. (Original) The apparatus of claim 1 wherein the filter body is substantially cylindrical.

4. (Currently Amended) An apparatus for filtering molten metal held in a vessel before the metal enters a dosing tube, the apparatus comprising:
an attachment portion adapted dimensioned to attach to the a dosing tube; and
[[an]] a closed filtering surface area attached to and extending from the attachment portion to provide a filtering surface.

5. (Original) The apparatus of claim 4 wherein the attachment portion is annular.

6. (Original) The apparatus of claim 4 wherein the closed filtering surface area comprises a cylindrical portion having a beveled end distal the attachment portion and a planar surface attached to the beveled end.

7-10. (Cancelled).

11. (New) The apparatus of claim 1 wherein the surface attached to and substantially covering the beveled end is substantially planar.
12. (New) The apparatus of claim 1 wherein the filter body comprises:
silicon carbide or aluminum oxide; and
an aluminum-alloy resistant binder.
13. (New) An apparatus for filtering molten metal, the apparatus comprising:
a vessel for holding molten metal;
a dosing tube disposed in the vessel; and
a filter attached to the dosing tube.
14. (New) The apparatus of claim 13 wherein the filter is mounted onto an inlet end of the dosing tube.
15. (New) The apparatus of claim 13 wherein the filter is cemented to the dosing tube.
16. (New) The apparatus of claim 13 wherein the filter rests on a bottom floor of the vessel.
17. (New) The apparatus of claim 16 wherein the filter includes a beveled end that rests on the bottom floor of the vessel.
18. (New) The apparatus of claim 13 wherein the filter includes a beveled end.
19. (New) The apparatus of claim 13 wherein the dosing tube is disposed at an angle to vertical.
